Subject: Take Millican Valley off the list of considerations for a proposed landfill.

Some people who received this message don't often get email from gkontich@gmail.com. [Learn why this is important](#)

[EXTERNAL EMAIL]

I am a landowner of 15 acres in the Millican Valley, a 45 year Hang Glider pilot using Pine Mountain, an avid hiker in the Millican Valley, a University of Oregon Observatory supporter and dirt bike enthusiast in the Millican Valley and supporter of the many Historical sites in the Millican area

I'm writing to you to express my opposition to any type of landfill in the Millican Valley for the following reasons:

1. The proposed site will be too close to the community of residents that inhabit the Millican Valley
2. There would be a high impact on the visual scenic landscape
3. There are many cultural heritage sites in the Millican Valley:
4. Danger to the aquifer under the Millican Valley
5. Pine Mountain Observatory is a huge asset for the county and would be negatively affected
6. HV (off-road vehicles) trail system is already in place and heavily used
7. Mountain bikers and hikers use this area extensively.
8. Pine Mountain is one of the premier free flight locations in the state

Please take Millican Valley off the list of considerations for a proposed landfill.

Gary Kontich
Bend, Oregon
